2. MORE ON STRATEGIES AND RISKS

=====

GLIDE PATH MECHANICS

The Fund automatically rebalances and shifts allocation over time. Quarterly, the Fund's portfolio is rebalanced to its target allocation.

Adjustments are intentionally gradual to avoid abrupt market timing decisions. The full glide path schedule is in VG-1.

USE OF UNDERLYING FUNDS

The four underlying index funds are managed by separate Vanguard advisors (Equity Index Group and Fixed Income Group).

ADDITIONAL RISK DETAIL

- Sequence-of>Returns Risk - Poor returns near the target date can permanently impair a retiree's withdrawal sustainability.
- Inflation Risk - The Fund does not explicitly hedge inflation through TIPS or commodities.
- Behavioral Risk - Investors may abandon the Fund during drawdowns, locking in losses.
